

LIST OF REFERENCES TO AUTHENTIC DESCRIPTIONS
OF AUSTRALIAN BIRDS' EGGS.

BY A. J. NORTH.

Having received at various times, many inquiries as to where authentic descriptions of Australian Birds' Eggs may be found, I beg to lay before the Society this List of References, hoping that it may prove useful, to those members, who like myself take an interest in Australian Oology. I may say that these references refer to descriptions published chiefly since the issue of Gould's 'Hand-book to the Birds of Australia,' and that this List will be augmented from time to time as descriptions of authentic specimens come under my notice.
